TOMOMI OKI

My passion lies in using my creativity to build tools for the digital future. My experiences in the past profession have allowed me to understand the importance of delivering commercially viable products and maintaining quality at its best. Along the way, skills that I have learnt enable me to work collaboratively in a team environment, clearly communicate ideas to people and thrive under pressure.

KEY SKILLS - WEB DEVELOPMENT & DESIGN

- Front-end: HTML5, CSS3, SCSS, React.js, Angular 2+, Bootstrap, Flexbox and Grid, SVG

- Back-end: Ruby on Rails, Node.js , Express.js, SQLite, PostrgreSQL, MS SQL, MongoDB

- Experience in using the following tools: JIRA, GitHub, Bitbucket, Figma, Jenkins, TortoiseSVN, Trello

- Strong capabilities in producing a web app from concept, design to production by designing user experience (UX) elements such as hand drawn/high fidelity wireframes, user flow diagrams and database schema design to guide the build process

---

PERSONAL PROJECT HIGHLIGHTS

Tanto Management system

Sales management app built for a Japanese knife store at QT Hotel.

https://mct-project-t3-demo.netlify.com

Tech Stack:
Node
Express.js
MongoDB
React
Bootstrap

Repository:
https://github.com/okichan/major-project-term3

Wordsworth

An Airtasker-like translation portal for office workers and translators.

https://wordsworth.herokuapp.com

Tech Stack:
Ruby on Rails
AWS
PostgreSQL
Bootstrap

Repository:
https://github.com/okichan/wordsworth

Portfolio

My first personal portfolio web page.

https://tomomioki.netlify.com/

Tech Stack:
Node
React
SCSS / SASS

Repository:
https://github.com/okichan/portfolio_v2

WORK EXPERIENCE

Front-End developer intern   **Serraview (2018 Feb)**

Serraview is a cloud-based software company (SaaS) that provides space optimisation solutions. Their key service includes providing real-time data such as desk occupancy rate and peak people value to assist strategic control of clients' workspace.

● Worked on front-end development using Angluar4 under agile environment (JIRA)
● Shipped a few enhancements including cross-browser compatibility fixes etc

Production Set-up Officer   **GBW (2007 – 2016)**

GBW is a Customer Experience and Mystery Shopping agency that specialises in collecting customers' feedback for some of the world's largest brands. Their mission is to help clients track and improve customer experience by using a range of advanced products and services to ensure insights are accurate, current and applicable.

By using in-house GUI…

● Maintained survey lifecycle
● Programmed back-end survey logic
● Generated pdf survey forms
● Built client reports based on their mock-up

Also…
● Performed data extraction using MS SQL
● Trained Java by the dev team and deployed features to in-house software

Customer Support/ Quality Control Officer   **GBW (2007)**

● Scanned through mystery shopper reports to spot contradictions, detect potential fraud
● Responded enquiries over phone / email

EDUCATION

Coder Academy   **2017 – 2018**
Diploma of Information Technology

Oxford Brookes University   **2004 – 2005**
English Language and Literature/Letters

Yasuda Women's College   **2002 – 2004**
Associate's Degree (Business, Commerce, Secretarial Management, English for Business)
